For decades the dental industry has known the Lysta brand and its products as being top of the line.

The founders of Lysta Aps, Anette, and Gregers Lystager have provided the dental and medico industry with top-notch dental tools and equipment. Today Annette and Gregert are both senior citizens and they want to let other and younger people run the production and development of the Lysta brand and product range for the customers' benefit.

There has been a year-long relation between Lysta and ATE, and the focus on high quality will remain unchanged as high quality of products is a priority to ATE Denmark as well as original the founders of Lysta.

From now on, you will meet the staff of ATE Denmark, as ATE MEDICO is a subbrand of ATE Denmark ApS.

Please contact us for any pricing information you need, as we service and sell all Lysta products.
